AMENDMENT TO THE CLAIMS

1. (Currently amended) A transportable grill comprising a lateral element, a vertical element, and a grill unit, said vertical element and said lateral element each comprising a ground engaging portion ~~comprising a ground engaging portion~~, said lateral element comprising a mounting element and a junction element, wherein said junction element allows traverse of the junction element relative to the vertical element to allow alternately positioning the junction element and associated lateral element in travel and use positions.

2. (Previously presented) A transportable grill according to claim 1, wherein said junction element further comprises a locking feature for locking the position of the junction element relative to the vertical element.

3. (Previously presented) A transportable grill according to claim 1, wherein said mounting element further comprises a retention feature to retain said mounting element in a receiver hitch when said mounting feature is engaged to a receiver hitch.

4. (Previously presented) A transportable grill according to claim 1, wherein said transportable grill further comprises a lifting device for assisting a user in positioning the junction element relative to the vertical element.

5. (Previously presented) A transportable grill according to claim 1, wherein said lateral element furthermore is hinged relative to the junction element.

6. (Previously presented) A transportable grill according to claim 1, wherein said vertical element may be adjusted to vary the location of a grill connected to said vertical element.

7. (Currently amended) A transportable grill comprising a lateral element, a vertical element, and a grill unit, said vertical element and said lateral element each comprising a ground engaging portion ~~comprising a ground engaging portion~~, said lateral element further comprises a means for engaging a vehicle receiver for engaging said transportable grill to a vehicle, and wherein said lateral element further comprises a means for varying the position of the horizontal element relative to the vertical element.

8. (Previously presented) A transportable grill according to claim 7, further comprising a means for fixing the position of the lateral element at least one position relative to the vertical element.

9. (Previously presented) A transportable grill according to claim 7, further comprising a means for retaining said lateral element in a vehicle receiver when said lateral element is engaged to said vehicle receiver.

10. (Previously presented) A transportable grill according to claim 7, further comprising a means for lifting the vertical element relative to the lateral element to assist in positioning said transportable grill in a travel position.
